Product Specific Information

PA1-1110 detects EGFR from human, non-human primate (monkey), mouse, and rat samples.

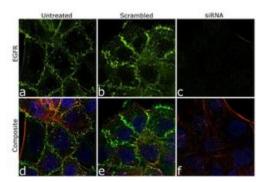

br />
PA1-1110 has been successfully used in Western blot, immunoprecipitation, immunohistochemistry, and immunofluorescence procedures. By Western blot, this antibody detects ~190 kDa protein representing EGFR from human HeLa cell extract.
-kDr />-The PA1-1110 immunogen is a synthetic peptide corresponding to residues C L(1198) R V A P Q S S E F I G A(1210) of human EGFR.

Advanced Verification Data

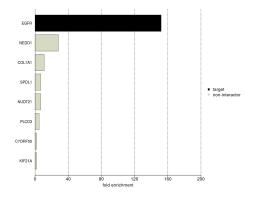

EGFR Antibody (PA1-1110)

Antibody specificity was demonstrated by showing that antibodies raised against the same target protein perform similarly. Immunofluorescence of EGFR using EGFR Antibody, Rabbit Polyclonal (Product # PA1-1110) along with another EGFR antibody (Product # MA5-14485) shows similar pattern of EGFR expression in A-431 cells. Independent antibody validation info.

EGFR Antibody (PA1-1110)

Antibody specificity was demonstrated by siRNA mediated knockdown of target protein. A-431 cells were transfected with EGFR siRNA and decrease of signal was observed in ICC using EGFR Rabbit Polyclonal antibody (Product # PA1-1110). Knockdown validation info.

EGFR Antibody (PA1-1110)

IP-MS enrichment of EGFR (LFQ intensity): EGFR was enriched 152-fold from A549 lysate compared to background proteins, using the optimized IP-MS workflow with Pierce MS-Compatible Magnetic IP Kit protein A/G (Product # 90409) and EGFR antibody (Product # PA1-1110). The STRING database (www.string-db.org) was used to identify the protein interactor list. See more information on IP-MS verification of antibody selectivity. IP-MS validation info.
