Description:

Low Range DNA Ladder consists of 11 DNA fragments ranging from 50 bp to 1 kb. It is designed to show virtually uniform spacing over a wide fragment range. The ladder allows sizing and concentration estimate of DNA fragments on agarose gels generated by PCR or restriction digest. The fragment mix is supplied in ready-to-use format containing orange and blue tracking dyes.

Recommended Load:

5 µl per lane

DNA Fragments:

50, 75, 100, 150, **200**, 300, 400, **500**, 600, 800, 1000 bp
